

Mig.finance

Financial services
for everyone,
everywhere

What do you do to open a bank account or payment account outside of your local jurisdiction?

Personal research — tons of information, lots of time to make the right decision. Unclear process of providing documentation

Applying to a specialized agent. Limited coverage of solutions + no ability for automatization of the process

Problems of the market

✘ Complex and unstructured process of providing documents

✘ Limited number of solutions with specialized agents

✘ Payment institutions rarely know how to work with agents/affiliates

✘ Affiliates get commissions with a big hold period + complicated process of withdrawal

✘ Payment institutions don't know how to utilize unapproved traffic

How do corporate service providers (CSPs) work now?

You come to the corporate service provider to open the banking or payment account

They bring you coffee

After it, they search for solutions for 5-7 days (risk profile and track-record)

You start the onboarding process and pay both to the corporate service provider and the payment institution (takes 7-15 days)

Problems (corporate service providers)

Limited exposure for a client, especially in need of different products or non-mainstream jurisdictions

Low acceptance rate for the underbanked countries

To check the status of your application you must write to your manager

Additional commissions for the companies and individuals if to apply via agents

Complicated process of collecting documents

Solutions for the clients

One-window service

**Automatic notifications
on the status of your
applications**

**30+ banking and payment
service providers
10+ products**

**Apply continuously for
different products from
one window**
